

## High Visibility And Protective Fabrics

Jason Mills manufactures a full line of high visibility fabrics for various end uses such as outdoor athletics (running, biking and walking), sportsman (hunting) and on-the-job protection. Available in blaze orange, neon yellow or custom dyed, our products are made TO BE SEEN. Offering a full line of ANSI & non ANSI compliant fabrics we are the brand leader when it comes to domestically sourced high visibility protection.

In addition to our 'high-viz' protective fabric line, we sell high tenacity, heavy duty nylon and polyester fabrics for protective glove sleeves. An industry standard in the glass cutting industry, these fabrics are designed to perform and stand up to high stress conditions time after time.

If you are interested in either high visibility or glove sleeve protection, please see styles 74, 1571, 78, 6700, 800 and 1925.
